

Building Block #10

An SSK (Slip, Slip, Knit) is a left leaning decrease that most closely mirrors a k2tog (knit two together). It is this symmetry that makes it the decrease of choice for many garments and lace knitting. It is difficult to find a pattern today that doesn't use this smooth-lying decrease.

To execute the SSK decrease correctly, it is essential to slip the stitches one at a time, entering each stitch as if you were going to knit it.
